III. COMMUNICATIONS:

IV. NEW BUSINESS

New complaints -

12-050-9011 – A nursing home does not maintain appropriate care, including updates regarding care for pressure sores, updated treatment plans regarding care and changing needs for care. Evidence that a resident had not been attended to (repositioned) for 5 hours during a shift. The HRA tabled opening the case until the coordinator can obtain and review a copy of the report and plan of correction from the Illinois Department of Public Health.

12-050-9014 A person was admitted to a regional hospital psychiatric unit feels that the hospital did not offer adequate and humane treatment. After admission and during group session, the patient drew a picture of the head nurse, portraying her as the devil. The patient knew it was not appropriate and childish that he had shown it to other patients however, the lead nurse was retaliatory throughout his stay because of that picture. The patient stated that when the nurse got word that there were three new patient's coming in, she made fun of the new patients. At 10:30 that night while attempting to calm himself, staring at a wall and did not realize how much time had passed. When a tech asked him what he was doing, he [the tech] concluded that the patient was threatening to jump out the window. The Nurse in

question pressed him regarding his anger level, while staff would normally ask a patient to contract for safety, this nurse implied that the patient was suicidal. The patient told the nurse that he was not suicidal but he was angry and they took him to another floor for restriction and restraint. The hospital financial department is harassing him because he stated he should not be billed because of the bad treatment that he got and that the staff wouldn't hear his complaints.

B. Other New Business:
